Detailed Action

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Meghan van Leeuwen on 8/1/07.

The application has been amended as follows:

In the Specification:

On Page 5, in the Brief Description of Fig.1, after the phrase "expression constructs" insert --(SEQ ID NO:8-11)--.

In the Claims:

In Claim 50, line 2, after the phrase "engineered to" insert the word --stably--.

The above amendment to the Specification was necessary to identify the nucleotide and amino acid sequences present in Fig.1 by the appropriate SEQ ID NO identifier.

Examiner's comments:

The generation of cell lines stably transformed with genes encoding antiapoptotic factors is unpredictable. At the time of applicants' invention, the molecular events

associated with the antiapoptotic activity of p35 were unclear and it was unpredictable whether any given cell line could be stably transformed with this baculoviral antiapoptotic gene.
